

Star 7

How to make star 7

We are making this star with templates, just for something different. I have adapted the original design so no Y seams are involved, making this a really easy piece to put together.

Please cut out the templates, the star line drawing is just used for reference.

Shape A, cut 2: 1 from medium, and 1 from dark fabrics.

Shape B, cut 4: 2 from medium, and 2 from dark fabrics.

Shape C, cut 4: 2 pairs right sides together, to get the mirrored look, from light fabric

Shape D, cut 4 from light fabric.

Shape E, cut 4: 2 pairs right sides together, to get the mirrored look, from light fabric.

Seam allowances are included in the templates, and seams added as per the dashed line.

Sewing together 1 half of the star:

Sew together pieces E, B and C

Sew together pieces A, D and D

Sew together pieces E, B and C

Repeat for the other half, then sew the two halves together. Press at all stages. Trim if necessary.

Please watch the video for a full tutorial, these instructions are a guide.
